

**QUALITY COUNCIL
OF INDIA**
Creating an Ecosystem for Quality

MISSION NIRAMAYA

**RATING OF NURSING AND
PARAMEDICAL COLLEGES**

Executive Summary

The Government of Uttar Pradesh has been actively working towards improving the state's healthcare ecosystem. The Honourable Chief Minister of UP, Shri Yogi Adityanath, launched 'Mission Niramaya' in October 2022, a program envisioned to improve the quality of pre-service education being imparted to nursing, midwifery and allied healthcare professionals. The Uttar Pradesh State Medical Faculty (UPSMF) is designated as the primary coordinating body responsible for establishing effective mechanisms and protocols to coordinate the administrative and policy activities under 'Mission Niramaya'.

The rating of colleges' initiative aims at empowering students to make informed decisions by creating transparency in the admission process and fostering competition among

colleges. This involves assessing and rating of colleges periodically against various benchmarks and parameters. These reports are then made public on the official website of the UPSMF. By encouraging colleges to improve their standards, 'Mission Niramaya' aims to inspire colleges to enhance their teaching and training methodologies and to strive towards higher levels of quality.

To execute the rating of nursing and paramedical colleges, UPSMF collaborated with health partners like Jhpiego and IHAT-UPTSU. The entire rating framework, including the assessment forms, the SOPs for assessors and the scoring criteria was designed by Jhpiego and IHAT-UPTSU. Their decade-long experience in the nursing and healthcare ecosystem enabled them to work as experts in this activity. The framework comprised three major pillars of criteria:

1. Infrastructure
2. Teaching-Learning Process
3. Learning Outcomes

UPSMF engaged QCI to assess and rate colleges. Their responsibilities included conducting desktop analysis of the online information submitted by colleges, guiding colleges to make necessary corrections

based on the analysis and creating a pool of qualified validators aligned with the qualifications specified by UPSMF. They also conducted validator training in collaboration with Jhpiego and IHAT-UPTSU, and physical visits to colleges to validate the information. To maintain transparency in the exercise, QCI mandated the use of body cameras by validator teams during physical visits.

The interactions taking place at the colleges were recorded and live-

streamed to a remote quality check team from QCI. A precursor to this step was the spot-check exercise which involved technical experts making surprise visits to randomly selected colleges and conducting assessments based on technical and non-technical parameters. Based on the combined data from QCI and the spot-check exercise, a comparative analysis was conducted under the guidance of UPSMF, wherein the reliability of the QCI data was checked.

Draft reports were shared with each college, allowing them to view the allotted scores for each parameter and submit grievances within a specified time window. QCI teams held one-on-one interactions with each college to address their grievances. Only legitimate or factual issues were presented before the Grievance Review Committee, and the entire process was video recorded. The committee made decisions to modify scores for valid causes, which were then communicated to the respective colleges. Upon finalization of the reports for each college, grades (A, B, C, D, and E) were assigned based on their final normalized weightage scores.

Such a transformative and holistic measure in the field of nursing and paramedical education has been implemented in the country for the first time, thus addressing the need of the hour.

INTRODUCTION

Mission Niramaya : Enhancing the Quality of Nursing & Paramedical Institutes in Uttar Pradesh

The Government of Uttar Pradesh (GoUP) recently introduced a flagship program aimed at ensuring high-quality clinical services within the state. Known as Mission Niramaya, this program recognized the crucial role played by nursing and allied healthcare professionals, especially in light of the recent pandemic. It emphasized the need for credible pre-service education to enhance the quality of these vital healthcare professions. Mission Niramaya not only focused on increasing access to healthcare education but also emphasized the importance of maintaining high standards of quality.

The program, launched by the Honourable Chief Minister on 8th October 2023, aimed to improve the quality of training provided by pre-service institutions affiliated with the UP State Medical Faculty (UPSMF) through regular rating evaluations. These evaluations assessed the infrastructure, internal processes, and competencies of faculty members and students, all of which indicate the quality of education imparted to students.

To generate these ratings, relevant information regarding the infrastructure, internal processes, and competencies of the faculty and students was collected. Third-party assessors conducted on-ground inspections to verify the gathered information. The ratings obtained through this comprehensive evaluation process are being made public and will be published on UPSMF's official website. This transparency was intended to provide visibility to prospective and current students, their parents, and other stakeholders, allowing them to make informed decisions regarding the quality of institutes they chose for nursing and paramedical education.

The publication of ratings will serve two primary purposes. Firstly, it would provide prospective students and their families with valuable insights into the quality of various institutes, enabling them to make well-informed choices when selecting an institution for their education. Secondly, the ratings would serve as a signal to the institutes themselves, highlighting their relative performance and areas in need of improvement. This feedback mechanism will motivate

institutions to enhance their standards and strive for continuous improvement.

In line with the overall objective of Mission Niramaya, the Government of Uttar Pradesh was committed to providing opportunities and pathways for institutions to enhance their quality of education. One such avenue involved mentor institutions, which guided and supported other institutions in their quest for improvement. Through these mentorship programs, institutes received the necessary guidance and assistance to elevate their standards and achieve higher ratings.

Mission Niramaya represented a significant step forward in ensuring that nursing and paramedical education in Uttar Pradesh met the highest standards of quality. By focusing not only on quantity but also on the quality of pre-service education, the policy recognized the importance of a well-trained workforce in delivering exceptional healthcare services. With its emphasis on transparency, accountability, and continuous improvement, Mission Niramaya set a strong foundation for the future of nursing and paramedical education in Uttar Pradesh, ultimately benefiting the healthcare sector and the people it served.

Partners

1. Uttar Pradesh State Medical Faculty (UPSMF) is the driver of the implementation of Mission Niramaya. As a key partner, UPSMF collaborated with various agencies and stakeholders to enhance the quality of pre-service education programs in the nursing and paramedical fields. UPSMF actively participated in the assessment and rating exercise, working closely with organizations such as UPSMF, Jhpiego, UPTSU, and QCI. They provided guidance, oversight, and coordination to ensure the smooth execution of the Mission's objectives. With their expertise and commitment, UPSMF contributed to the establishment of a robust quality assurance framework, fostering continuous improvement in the standard of teaching and training for students in nursing and paramedical colleges.

2. UPTSU (Uttar Pradesh Technical Support Unit) played a crucial role in Mission Niramaya, contributing their technical expertise and guidance. As a key advisor, UPTSU provided valuable inputs on the framework and scoring matrix for the assessment and rating exercise. They were actively involved in cross-checking the data filled by assessors, ensuring accuracy and reliability. UPTSU offered technical guidance to colleges in understanding the rating framework and assisted in the validation of scoring procedures. Their support and guidance were instrumental in maintaining the integrity and quality of the assessment process, thus contributing to the overall success of Mission Niramaya in improving the standards of pre-service education in nursing and paramedical institutes.

3. Jhpiego developed the rating framework and provided essential training to the stakeholders involved. They were responsible for creating a comprehensive framework that served as the foundation for assessing the quality of nursing and paramedical institutes. Additionally, Jhpiego provided valuable training to ensure that assessors were equipped with the necessary knowledge and skills to carry out the assessments effectively. They also played a crucial role in addressing queries and concerns raised by the stakeholders, ensuring a smooth and successful implementation of the mission. Jhpiego's expertise and support were instrumental in establishing a robust evaluation system to enhance the quality of education in the field of nursing and paramedical sciences.

4. QCI (Quality Council of India) played a significant role in Mission Niramaya by actively participating in the assessment and rating process. They were responsible for conducting a thorough analysis of the information submitted by colleges, providing guidance and support to rectify any identified gaps, and ensuring transparency and objectivity throughout the assessment exercise. QCI played a key role in creating a pool of qualified assessors, organizing their training in collaboration with Jhpiego, and overseeing the physical visits to colleges for data validation. To maintain the integrity of the assessment, QCI implemented measures such as live video and audio coverage of the assessment procedures using body cameras and remote quality checks. Their expertise in quality assurance and their commitment to transparency and reliability greatly contributed to the success of Mission Niramaya in improving the quality standards of nursing and paramedical education in the region.

Development of the rating policy

In a dedicated effort to enhance the quality of nursing and allied healthcare professional (AHCP) education in Uttar Pradesh, the UP State Medical Faculty (UPSMF) has undertaken a comprehensive evaluation of all nursing and AHCP institutes across the state. As part of this initiative, a well-crafted rating policy was developed and notified on November 11th, 2022, on UPSMF's official website. The main objective of the rating policy is to assess the quality of all the pre-service institutions affiliated with UPSMF. Furthermore, the Government of

Uttar Pradesh (GoUP) is committed to providing ample opportunities and pathways for institutions to enhance their quality standards and ultimately improve their ratings.

The implementation of the rating policy brings forth numerous benefits not only for the institutions themselves but also for potential students and employers. By engaging in an informed review process, institutions gain valuable insights into their own strengths, weaknesses, and potential opportunities. This self-awareness empowers them to identify internal areas requiring planning and resource allocation, leading to more effective decision-making and resource utilization. Moreover, the rating policy serves as an incentive for institutions to embrace innovation and adopt modern pedagogical methods, paving the way for a transformative educational experience. As a result, institutions can cultivate a renewed sense of identity and direction, aligning their practices with the evolving needs and expectations of students and employers.

For potential students, the rating policy ensures reliable and trustworthy information regarding the quality of education offered by different institutions. This enables them to make informed choices and select institutions that align with their educational goals and aspirations. Similarly, employers benefit from accessing accurate information about the quality of education provided by prospective recruits. By having reliable insights into the capabilities and competencies of graduates from various institutions, employers can make more informed hiring decisions.

Furthermore, the rating policy fosters a culture of collaboration and knowledge sharing among institutions through inter and intra-institutional interactions. This collaborative approach facilitates the exchange of

best practices, leading to collective improvements in the quality of education provided by these institutions. Overall, the development and implementation of the rating policy by UPSMF signify a determined commitment to elevate the standards of nursing and AHCP education in Uttar Pradesh, benefiting institutions, students, and employers alike.

Salient features of the Rating Policy

- ♦ The focus of the rating policy is to improve the quality of training in pre-service institutions in the state associated with the UP State Medical Faculty (UPSMF) by rating these institutions on a regular evaluation
- ♦ Information about infrastructure, internal processes, and competencies would be collected from institutes and confirmed during on-site inspections by third-party assessors in order to generate these scores.
- ♦ The efficient process of rating allows candidates to identify the best institute during counselling. Also, with a robust ranking system in place, colleges/institutes will strive to improve the quality of education and training in their institute.
- ♦ These ratings would be made public (through the UPSMF website) in order to:
 - a. Make the quality of education visible to students, parents, and other stakeholders so that they can choose the best institutes for pursuing their education.
 - b. Inform institutes about their respective performance and areas for improvement..

Process of Development of Rating Policy

The development of the Rating Policy was a collaborative effort between IHAT-UPTSU, Jhpiego and UPSMF with oversight from UPSMF. Extensive research was undertaken, encompassing a thorough review of research papers exploring diverse rating processes. The principles of the rating policy were heavily influenced by an in-depth examination of the Medical Assessment and Rating Board of the National Medical Commission (NMC) and the National Assessment and Accreditation Council (NAAC).

To ensure inclusivity, multiple stakeholder meetings were organized, involving UPSMF, IHAT- UPTSU and Jhpiego. The valuable recommendations shared by all stakeholders were thoughtfully incorporated and compiled by IHAT-UPTSU, resulting in a comprehensive and well-rounded Rating Policy.

Development of the standardized tool

National Health Mission issued operational guidelines, defining performance standards for strengthening pre-service nursing education in 2013, which were later revised in 2017. The issued guidelines comprise 5 sections, provided below:

1. Classroom and practical instruction,
2. Clinical instruction and practice,
3. School infrastructure and training materials,
4. School management processes, and
5. Clinical skills of practicing nursing mentors at the parent / affiliated hospitals, where student nurses & midwives undertake the clinical experience.

In Uttar Pradesh, more than 90% of the nursing institutes are in the private sector and hence they were not strictly adhering to the above-mentioned guidelines. Therefore, it was decided to assess compliance with the guidelines in these institutes through a rating mechanism. For the purpose of rating, there emerged a need for a tool that can detail the guidelines in the form of easily usable checklists, based on which institutes can be assessed.

In reference to the guidelines and performance standards defined therein, Jhpiego developed a rating tool for assessing the quality of nursing institutes. Since there were no specific guidelines available for paramedical institutes, the Jhpiego team used its national and international expertise to develop similar tools for paramedical institutes. The broad criteria of the rating tool are provided below:

- Infrastructure: classrooms, hostel, laboratories (models/mannequins), books & journals, computers, audio-visual aids, seating arrangement for staff, bed occupancy of parent hospital, and availability of departments for the clinical posting.
- Faculty availability: reviewed qualification documents of all faculties.
- The teaching-learning process: the academic plan, master rotation plan, clinical rotation plan, academic policies, and learning resources. Observation of faculties classroom facilitation, clinical demonstration, and clinical supervision skills.
- Practical skills of faculty and students through OSCE: To assess the skill competency of faculty and students, OSCE checklists were prepared for all subjects of ANM, GNM, and B Sc nursing courses.

Additionally, the tool also captured the basic charter documents of the institute such as trust deeds / society registration certificates /company registration certificates, fire NOCs, etc.

To facilitate smoother implementation of the tool, Jhpiego developed Standard Operating Procedures for validators specifying methods and techniques for using the tool.

Jhpiego and IHAT-UPTSU collaborated to create a Rapid Assessment Tool for the Rating of Nursing and AHCP colleges in Uttar Pradesh, building upon the SBMR tool developed by Jhpiego. A dipstick assessment was conducted in 20 colleges across UP by Jhpiego to evaluate its effectiveness. The Rapid Assessment Tool serves as the foundational assessment form for rating colleges in Uttar Pradesh, providing a structured framework to assess and evaluate their performance. The assessment tool developed has been attached as annexure.

Training of Validators

To facilitate the rating exercise, two categories of validators were chosen: technical and non-technical. The technical validators were responsible for evaluating aspects such as nursing and paramedical teaching-learning processes, learning outcomes, and other technical elements. On the other hand, the non-technical validators focused on assessing the documentation and availability of infrastructure. This dual approach ensured a comprehensive and thorough evaluation of institutes in UP.

A 2-day training program was designed by the Jhpiego for the 110 technical validators. The broad areas that were covered during the training are provided below:

Day 1

- Standard Operating Procedures
- Observation of classroom facilitation skills
- Observation of clinical demonstration skills

Day 2

After the day-long classroom session on the 2nd day, validators were taken to the hospitals & nursing institutes to gain practical understanding through:

- Orientation of models/mannequins in the lab
- Orientation on data collection related to bed occupancy and departments available in the hospital

Other than the in-person training, two more batches of 94 Non-technical validators underwent virtual training on SOPs at UPSMF.

During the in-person training, a 13-member QCI team was present to observe the behavioural and other aspects of the potential validators to ensure that only those suitable for the validation process are included in the final list of validators for on-ground assessments of colleges. The final selection of the technical validators was done based on their OSCE score (conducted by Jhpiego and IHAT-UPTSU). Finally, a total of 70 technical and 58 non-technical validators were selected for on-ground assessments by QCI.

Spot checks

To ensure the accuracy and dependability of the on-ground assessments carried out by the Quality Council of

India (QCI), the UP State Medical Faculty (UPSMF) implemented a rigorous spot check mechanism. These spot checks, supervised by UPSMF, involved unannounced visits to randomly selected colleges, where assessments were conducted by technical health experts utilizing both technical and non-technical parameters. By incorporating these spot checks, UPSMF aimed to validate and verify the data collected by QCI.

The spot checks served as an additional layer of evaluation, supplementing the assessments conducted by QCI. Through these surprise visits, UPSMF sought to assess the consistency and credibility of the information gathered by QCI. The technical health experts involved in the spot checks possessed specialized knowledge and expertise in the field, enabling them to make informed judgments based on the specific technical and non-technical aspects of the colleges.

The data collected from both QCI assessments and the spot check exercise underwent a comprehensive comparative analysis, overseen by UPSMF. This analysis aimed to determine the reliability and accuracy of the data gathered by QCI. By combining the information from QCI's assessments and the spot checks, UPSMF could identify any discrepancies, inconsistencies, or areas that required further scrutiny. Through this diligent evaluation, UPSMF aimed to achieve a reliable and trustworthy dataset that accurately reflected the quality of the assessed colleges.

By conducting spot checks and conducting a thorough comparative analysis, UPSMF demonstrated its commitment to maintaining the highest standards of quality and reliability in the assessment process. This multi-faceted approach ensured that the data collected by QCI was subjected to rigorous scrutiny and validation, providing assurance to stakeholders and ensuring the integrity of the assessment results.

Rating of Nursing Colleges
